

No price increases due to tariffs

As has been widely reported, the Office of the United States Trade Representative recently announced that certain goods imported into the U.S. from China would face a 25% Section 301 tariff. While it is common for companies in our industry to use these tariffs as a justification to raise prices, DMF is committed to delivering the same excellent products and excellent value that you have come to expect.

Our intention is to keep our prices at the same levels despite the Section 301 tariffs. We understand how important it is for our customers to move forward without interrupting ongoing projects or disrupting future plans. Because we manufacture the majority of our products outside of China, DMF's products will be largely unaffected by these tariffs and our supply chain will remain uninterrupted.

By making this promise to you, we seek to give you the confidence to continue working with our company. DMF's greatest asset is the trust our customers place in us, and we hope to continue our successful relationships far into the future.
